

Lesson 1

Write each mixed number as an improper fraction.

1. $2\frac{3}{8} = \frac{19}{8}$

3. $1\frac{1}{4} = \frac{5}{4}$

5. $7\frac{2}{5} = \frac{37}{5}$

2. $6\frac{1}{9} = \frac{55}{9}$

4. $2\frac{3}{7} = \frac{17}{7}$

6. $4\frac{5}{9} = \frac{41}{9}$

Do the fraction and the decimal match? Write *yes* or *no*.

7. $\frac{1}{9}$ and 0.15 no

8. $\frac{2}{8}$ and 0.25 yes

9. $\frac{3}{7}$ and 0.38 no

10. $\frac{1}{5}$ and 0.15 no

Lesson 3 Label each missing number on each number line.

Name a decimal between the given decimals. Record it on the number line.
